

ICEGLIDE™

Less Friction.
More Movement.

ICEGLIDE™

Debs Textile Corporation's **ICEGLIDE™** technology uses a special type of polyethylene fiber that is knitted to create textiles that are ultra-smooth against the skin. Improve your performance by eliminating any friction between your body and the fabric.

ICEGLIDE™ fabrics come with the added benefit of cooling, moisture management, and reflection of harmful UV rays.

ICEGLIDE™. Less Friction. More Movement.

01 No Skin Irritation

02 Less Friction

- Avoid any heat typically generated by friction against the skin.

03 Stay Dry

- Polyethylene's water repellent properties drive out the sweat to the outside of the fabric

04 Cool Touch

- Coolness achieved by natural characteristic of polyethylene which doesn't absorb any moisture
- High Qmax performance

05 UV Protection

- UPF15 & UPF30 is achieved by special knitting construction of fabrics
