

MEGADRY™

Super Wicking Technology

MEGADRY™

MEGADRY™ is a new perspiration management technology capable of managing heavy perspiration.

MEGADRY™ is a combination of yarn and knitting construction technology which enables a super-wicking function, keeping the skin dry all the time.

MEGADRY™ consists of hydrophobic yarns on the skin side and hydrophilic yarns on the face side which force out the sweat to the outside of the garment, getting quickly released into the air and preventing any moisture from coming back to the skin.

This excellent moisture management technology avoids discomfort during exercise and keeps your skin healthy at all times.

01 Superior Wicking

- Does not retain water for long – quick release and dry

02 Prevents Wet Transparency Effect

- Garment dries out quickly avoiding the undesired transparency when garments are wet

03 Comfort At All Times

- Prevents stickiness of clothing after perspiration

04 Healthy

- Body can maintain temperature after a work-out
- Does not feel cold because fabric is always dry
- Prevents skin irritation from movement in wet clothing
