

# WELLFIT™

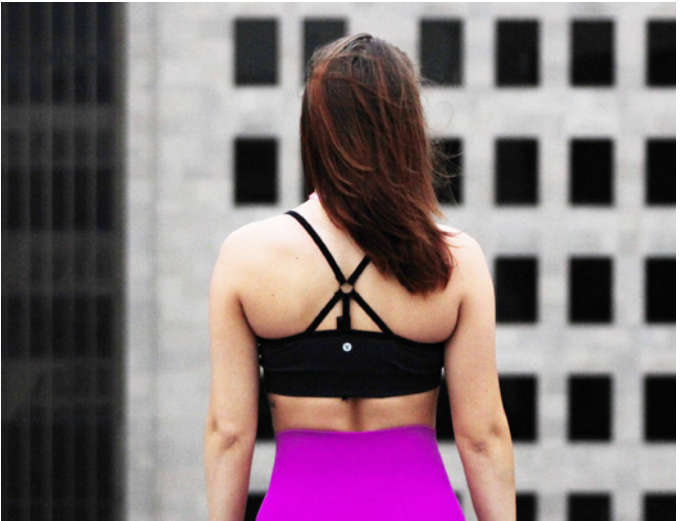

No Spandex. Maximum Stretch.

# WELLFIT™

Debs Textile Corporation's **WELLFIT™** technology is a special finishing method that enables fabrics to stretch without the use of spandex and recover perfectly by sustaining the fabric's original handfeel and durability.

Enabled by our expertise in low tension processing techniques, **WELLFIT™** fabrics can maintain the performance and functionality of a spandex.

Avoid unnecessary perspiration typically caused by the use of spandex in a garment and enjoy the free movement at all times.

## 01 Light

By avoiding the use of spandex, fabrics will naturally be lighter in weight.

## 02 Easy Care

High dimensional stability after washing compared to spandex blended fabrics.

## 03 Quick Dry

Faster drying by eliminating spandex.

## 04 Good Stretch & Recovery

Maintains the functionality compared to a spandex blended fabric.

## 05 Soft & Smooth Touch

Without spandex, the unique soft and smooth characteristics of the regular yarns used can be maximized.
